### Why use a Natural Glycerine Soap Bar?

**My natural soap contains only vegetable oils, no petroleum products or synthetic ingredients. Many contain essential oils that are naturally antibacterial. Fragrances in glycerine soaps stay very true. You get the aromatherapy benefits, not the soap smell. A bar of glycerine soap produces a lather that rinses off without a residue and moisturizes by pulling water from the air (not by using heavy fats and oils). My soaps are extremely mild. Your satisfaction is guaranteed on all my products. Please look inside for a listing of my bar soaps.**
